

Groundbreaker.

First out of the gate. She's a trailblazer in a new industry. A visionary with a mission. A pilot. A dreamer.

An avid *Inc.* reader, Christine Durst created the first Web-based incubator for professionals who offer their services online. And someone noticed. Her company, Staffcentrix, LLC, has been commissioned by U.S. military bases across the country to help military spouses launch mobile Internet-based careers. Paving the way for thousands to follow.

The Microsoft® Tablet PC is a ground-breaking mobile tool. Wherever you are, jot down notes, draw up plans, and send e-mails to the team — right on the screen of your laptop. Then watch your brilliant ideas transform into real solutions.

In the hands of Christine Durst.

It's a laptop. It's a simple pad and pen. It's a Tablet PC running Microsoft Windows® XP Tablet PC Edition.
